Replacement bracelets scope of supply:

- **10 x** Stainless steel spring bar
- **25 x** Bracelet comfort consisting of two parts including pre-assembled stainless steel spring bar

Mounting instructions:

Disassembly	
1.	Grab the thin, movable part of the spring bar with the fork by putting the tool in the gap between bracelet and bracelet holder.
2.	Press the spring bar together until the holding pin pops out.
3.	Remove spring bar on the opposite side.
4.	After removing the second spring bar in the same way, the bracelet can be changed. When inserting the new bracelet, please note that the part with the buckle belongs to the upper end.
Mounting	
1.	Put the spring bar through the bracelet and insert the holding pin to the end of the bracelet holder.
2.	Push the opposite holding pin into the spring bar with the fork of the spring bar cutlery and lead it in such a manner that it can finally be inserted neatly into the bracelet holder.
3.	3After setting down the spring bar cutlery, please push the holding pin through the spring in the spring bar entirely into the bracelet holder. The spring bar is now firmly fixed.
